

Praxis Medical is a privately billing clinic. This means a fee is payable on the day of your appointment, and the amount charged is determined at your doctor's discretion based on the type and complexity of your care. The list below provides a general guide to the fees you may be charged.

Each fee consists of three parts: the total fee, the Medicare rebate (refunded to your nominated account by the government), and the gap fee, which is your out-of-pocket cost after the rebate.

We accept electronic payment only and do not charge any transaction fees, surcharges or hidden practice fees.
